Product Description

20x7FT Small House Trailer ATM 4000kg Custom Trailer For Tiny House

House Trailer Overview

The house trailer represents an innovative travel solution that combines residential comfort with exceptional mobility. Built around a high-strength steel chassis core, this equipment integrates lightweight environmental protection panels with modular living space design to deliver both the functional completeness of traditional housing and the flexible mobility of a trailer.

Key Features & Applications

This versatile trailer provides comprehensive living solutions for various scenarios including:

- Travel and camping adventures
- Temporary office spaces
- Emergency resettlement operations
- Mobile living accommodations

Chassis & Mobility Specifications

The chassis incorporates mechanical optimization design, featuring high load-bearing wear-resistant tires and a stable traction system. Engineered for both highway long-distance transportation and camp short-distance mobility, it ensures smooth turning and easy traction capabilities.

Compatible with household cars and specialized traction vehicles for maximum flexibility in transportation options.

Durability & Protection Features

The trailer frame undergoes comprehensive anti-rust and anti-corrosion treatment, combined with advanced waterproof sealing technology and anti-shock/anti-vibration structural design. These features provide robust protection against outdoor weather elements and road vibrations, ensuring long-term stability and durability of the living space.
