

Wooden Board Utility Cargo Trailers Silver Galvanised Box Trailers ATM 1500KG

Our Product Introduction

for more products please visit us on tippers-trailers.com

Basic Information

- Place of Origin: China
- Certification: 9001/TS 16949, CCC, CE, ADR, DOT
- Minimum Order Quantity: 1
- Delivery Time: 20-30work days
- Payment Terms: L/C,D/A,T/T,D/P
- Supply Ability: Annual output :2000

Product Specification

- Name: Utility Cargo Trailers
- Trailer Dimensions: 3700*2055*1790mm
- Drawbar: 70*50*3mm
- Internal Dimensions: 2400*1525*330mm
- Wooden Board Height From The Ground: 515mm
- Rear Bulkhead: 1200mm*1405mm
- Surface Treatment: Hot-dip Galvanizing
- Color: Silver
- Light: LED DOT Light
- Shaft: 1.5-ton Shaft
- ATM: 1500kg
- Rated Load Capacity: 1130kg
- Weight Of The Skin: 370kg
- Guide Wheel: Lifting Outriggers

Product Description

Utility Wooden Board Trailer ATM 1500KG

The hot-dip galvanized multifunctional trailer is a high-performance transportation equipment that integrates anti-corrosion durability and multi-scene adaptability. With high-strength steel as the base material, after the overall hot-dip galvanizing process, the coating is dense and uniform, with strong adhesion, can resist the erosion of rain and snow, moisture, acid and alkali, and outdoor ultraviolet aging, can be used for a long time in harsh environments such as the wild, coastal, and engineering, and can significantly reduce the maintenance cost in the later stage.

With a modular and multi-functional design, the frame structure is optimized in terms of mechanics, balancing strong load-bearing capacity and flexible adaptability: equipped with adjustable guardrails, foldable cargo platform, layered shelves, Reinforced straps and other removable components can quickly switch to the transportation mode and easily carry a variety of items such as engineering equipment, camping equipment, agricultural products, tools and materials, logistics packages, etc. It is suitable for all scenarios such as family outdoor activities, farm operations, engineering construction, emergency transportation, commercial distribution, etc.

Equipped with flexible steering traction mechanism and high elastic wear-resistant tires, the turning radius is small, the traction is easy, the road driving is smooth, and it can also pass smoothly on unpaved roads. It can be adapted to a variety of traction equipment such as cars, tractors, and ATVs. The safety configuration is fully loaded, including anti-slip tow hooks, emergency braking system, anti-roll stability structure, and reflective warning signs. Some models can be equipped with anti-theft locks and shock-absorbing damping components, fully meeting the safety standards for road transportation.

The overall design takes convenience into account, leaving space for hoisting interfaces and inspection channels, making installation, disassembly, and daily maintenance easy and efficient; The foldable structure can reduce storage space, does not occupy space in the home or warehouse, is a multi-scene transportation tool that integrates anti-corrosion durability, flexibility, and safety, providing a stable and reliable mobile carrying solution for different needs.
