

## Heavy Duty 8\*5 Tandem Axle Trailer ATM2000kg

Our Product Introduction

for more products please visit us on [tippers-trailers.com](http://tippers-trailers.com)

### Basic Information

- Brand Name: 8\*5 Tandem Axle Trailer ATM2000kg

### Product Specification

- Spring: 6 Pieces
- Guide Wheel: 8 Inch
- Weight Of The Skin: 600kg
- Fully Welded Body & Chassis: Yes
- Removable Front And Rear Drop-down Doors: Yes
- Light: LED ADR Light
- Beam: 50\*50\*3
- Tire: 185R14LT
- Highlight: heavy duty tandem axle trailers,  
8x5 heavy duty tandem axle trailers,  
2000kg heavy duty tandem axle trailers

### Product Description

#### Product Description:

The Tandem Trailer is a robust and versatile towing solution designed to meet a wide range of hauling needs with efficiency and reliability. Featuring a tandem axle trailer configuration, this trailer offers enhanced stability and load distribution, making it an ideal choice for both personal and commercial use. With an ATM (Aggregate Trailer Mass) of 2000kg, the trailer is capable of carrying substantial loads while maintaining excellent maneuverability on various terrains.

One of the standout features of this tandem axle trailer is its durable construction, which includes a hot-dip galvanizing surface treatment. This treatment ensures superior resistance to rust and corrosion, significantly extending the lifespan of the trailer even when exposed to harsh weather conditions or rough environments. The galvanizing process provides a protective zinc coating that shields the metal framework from moisture and other corrosive elements, making the trailer a long-term investment for users who require dependable performance year-round.

The internal dimensions of the trailer are thoughtfully designed to accommodate a wide variety of cargo. Measuring 2365mm in length, 1520mm in width, and 300mm in height, the trailer's spacious interior allows users to transport bulky items securely and efficiently. These dimensions make it suitable for carrying everything from landscaping equipment and building materials to recreational gear and household goods. The ample space combined with the robust build ensures that the trailer can handle heavy and irregularly shaped loads without compromising safety or stability.

Safety and visibility are paramount when towing, and this tandem axle trailer is equipped with LED ADR lights to meet stringent road safety standards. The LED lighting system provides bright and reliable illumination, improving visibility during night-time or low-light conditions. These lights are designed to be energy-efficient, durable, and resistant to vibrations, ensuring they remain functional and effective throughout the trailer's lifespan. The inclusion of ADR-compliant lighting enhances the trailer's roadworthiness and helps prevent accidents by clearly signaling the trailer's presence and intent to other road users.

Our Product Introduction

for

Another practical feature of this trailer is the removable front and rear drop-down doors. These doors provide easy access to the cargo area from both ends, facilitating quick loading and unloading processes. The drop-down design allows the doors to serve as ramps when lowered, making it convenient to roll heavy equipment or vehicles onto the trailer without additional assistance. The ability to remove the doors entirely adds versatility, enabling the trailer to carry oversized items that require an open platform. This flexibility makes the tandem axle trailer an excellent choice for a variety of applications, from landscaping and construction to recreational activities.

The trailer rides on sturdy 185R14LT tires, which are specifically designed to handle heavy loads and provide a smooth towing experience. These tires offer excellent traction and durability, ensuring stability and safety on different road surfaces. Their size and construction are optimized for tandem axle trailers, allowing for efficient weight distribution and reducing wear and tear on the trailer's suspension system. The combination of reliable tires and tandem axles enhances overall towing performance, making this trailer dependable for frequent and heavy-duty use.

In summary, the Tandem Trailer with an ATM of 2000kg is a highly functional and resilient transport solution. Its hot-dip galvanized frame, spacious internal dimensions, LED ADR lighting, removable drop-down doors, and robust 185R14LT tires collectively contribute to a trailer that is built to handle demanding tasks with ease. Whether you need a tandem axle trailer for work or leisure, this model offers the durability, safety, and versatility required to get the job done efficiently and reliably. Investing in this tandem axle trailer means choosing a product engineered for long-term performance and user convenience.

### Features:

Product Name: Tandem Trailer  
Size: 8\*5 feet  
ATM: 2000kg  
Tandem axle trailer for improved stability and load distribution  
Light: LED ADR Light for enhanced visibility  
Tire: 185R14LT for durability and performance  
Drawbar: 100\*50\*3.75 mm, 1500 mm long for strong towing capability  
Fully Welded Body & Chassis for maximum strength and durability  
Internal Dimensions: 2365\*1520\*300 mm providing ample cargo space

### Technical Parameters:

Drawbar	100*50*3.75, 1500 Long
Spring	6 Pieces
Axis	45 Square Steel Bars
Trailer Dimensions	4600*2700*800mm
ATM	2000kg
Surface Treatment	Hot-dip Galvanizing
Beam	50*50*3
Removable Front and Rear Drop-down Doors	Yes
Swing Wheel	8 Inches, Operable
Color	Silver

### Applications:

The 8\*5 Tandem Axle Trailer ATM2000kg is an incredibly versatile and reliable trailer designed to meet a variety of application occasions and scenarios. Whether you are a professional tradesperson, a small business owner, or an outdoor enthusiast, this trailer can handle your transportation needs efficiently and safely.

One of the most common application occasions for the ATM2000kg trailer is in the construction and landscaping industry. Its robust build, featuring 45 square steel bars for the axle, ensures that heavy loads such as building materials, tools, and machinery can be transported with ease. The trailer dimensions of 4600\*2700\*800mm provide ample space for bulky items, while the collision brake system enhances safety when hauling heavy loads on busy or uneven roads.

For agricultural purposes, the 8\*5 Tandem Axle Trailer ATM2000kg is an excellent choice. Farmers can use it to transport produce, livestock feed, or equipment around the farm or to markets. The removable front and rear drop-down doors add convenience by allowing easy loading and unloading of goods, even in tight spaces. Additionally, the LED ADR lights ensure high visibility during early morning or late evening work, improving safety for both the driver and other road users.

Outdoor enthusiasts and recreational users will also find the ATM2000kg trailer highly beneficial. Whether you're transporting motorcycles, ATVs, camping gear, or other bulky items, the tandem axle design provides stability and balance, ensuring a smooth ride. The sturdy construction and reliable braking system make it suitable for long trips, including off-road adventures.

Small businesses involved in delivery or mobile services can rely on this trailer to expand their operational capacity. The removable drop-down doors allow for quick access to inventory, making loading and unloading more efficient. The trailer's size and durability mean it can handle frequent use without compromising performance.

In summary, the 8\*5 Tandem Axle Trailer ATM2000kg is designed to be a multi-purpose trailer suitable for construction, agriculture, recreation, and business applications. Its combination of strong 45 square steel bar axles, collision brakes, LED ADR lighting, and practical removable doors makes it a dependable asset for a wide range of transport scenarios. If you need a trailer that offers both capacity and safety, the ATM2000kg is an excellent choice for your diverse hauling needs.
