

## Hot-dip galvanized utility trailer with 1500kg rated load capacity and modular multifunctional design for versatile cargo transport

Our Product Introduction

for more products please visit us on [tippers-trailers.com](http://tippers-trailers.com)

### Basic Information

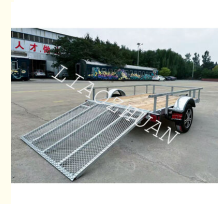

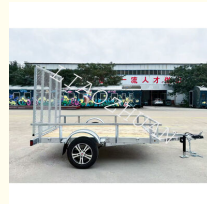

### Product Specification

- Overall Dimensions: 3600mm \* 2060mm \* 1950mm
- Hitch Pin: 70\*50\*3mm
- Internal Dimensions: 2400mm \* 1530mm \* 300mm (plus 1400mm Rear Tailboard)
- Surface Treatment: Hot-dip Galvanizing
- Color: Silver
- Light: LED DOT Light
- Shaft: 1500kg Shaft
- Rated Load Capacity: 1130 Kg
- Net Weight: 370 Kg
- Base Plate: Made Of Wood, Pine, 50mm Thick
- Side: 300mm, 30mm
- Spring: 6 Pieces
- Brake: Electric Brake
- Crossbeam: 50\*50\*3mm

### Product Description

#### Wooden Board Utility Cargo Trailers - Silver Galvanised Box Trailers ATM 1500KG

**Model:** 8\*5 ATM1500kg Single-axis Trailer

#### Premium Hot-Dip Galvanized Construction

This multifunctional trailer features high-performance transportation capabilities with exceptional anti-corrosion durability and multi-scene adaptability. Constructed from high-strength steel base material, the entire unit undergoes hot-dip galvanizing to create a dense, uniform coating with superior adhesion that resists rain, snow, moisture, acid, alkali, and UV aging.

#### Exceptional Environmental Resistance

Designed for long-term use in harsh environments including wilderness areas, coastal regions, and construction sites, this trailer significantly reduces long-term maintenance costs while maintaining structural integrity.

#### Modular Multi-Functional Design

The optimized mechanical frame structure balances strong load-bearing capacity with flexible adaptability, featuring:

Adjustable guardrails for customizable cargo containment

Our Product Introduction

- Foldable cargo platform for versatile loading options
- Layered shelving systems for organized transportation
- Reinforced straps and removable components
- Quick switching between transportation modes

#### Versatile Application Scenarios

Ideal for carrying diverse items including engineering equipment, camping gear, agricultural products, tools, materials, and logistics packages. Suitable for:

- Family outdoor activities and recreational use
- Farm operations and agricultural applications
- Engineering construction and project sites
- Emergency transportation requirements
- Commercial distribution and logistics

#### Superior Mobility & Performance

Equipped with flexible steering traction mechanisms and high-elastic wear-resistant tires for excellent maneuverability. Features include small turning radius, easy traction, smooth road performance, and reliable operation on unpaved surfaces. Compatible with various traction equipment including cars, tractors, and ATVs.

#### Comprehensive Safety Features

Fully loaded safety configuration ensures reliable operation:

- Anti-slip tow hooks for secure connections
- Emergency braking system for controlled stops
- Anti-roll stability structure for load security
- Reflective warning signs for visibility
- Optional anti-theft locks and shock-absorbing components

#### Convenient Design & Storage

Thoughtful engineering includes hoisting interfaces and inspection channels for easy installation, disassembly, and maintenance. The foldable structure minimizes storage space requirements, making it ideal for home or warehouse use without occupying excessive space.

This multi-scene transportation tool combines anti-corrosion durability, flexibility, and safety to provide stable, reliable mobile carrying solutions for diverse requirements.
