#### Basic Information

- Brand Name: 10x5 Tandem Axle Hot-Dip Galvanised Box Trailer 2000kg ATM
- Certification: 9001/TS 16949, CCC, CE, ADR, DOT

#### Product Specification

- Trailer Dimensions: 4720\*2050\*1480mm
- Drawbar: 120\*60\*4mm 1500 Long
- Internal Dimensions: 3040mm\*1530mm\*300mm+600mm
- Surface Treatment: Hot-dip Galvanizing
- Fully Welded Body & Chassis: Yes
- Removable Front And Rear Drop-down Doors: Yes
- Color: Silver
- Light: LED ADR Light
- Axis: 45 Square Steel Bars
- ATM: 2000kg
- Rated Load Capacity: 1200kg

#### Product Description

##### Product Description:

The Box Trailer is a versatile and durable solution designed to meet a wide range of transportation needs. Featuring a sleek silver color, this trailer not only offers a modern and professional appearance but also ensures excellent visibility and safety on the road. Its robust construction and thoughtful design make it an ideal choice for both personal and commercial use.

One of the standout features of this Box Trailer is its impressive internal dimensions. Measuring 3040mm in length, 1530mm in width, and 300mm in depth, with an additional 600mm height, it provides ample space for carrying various types of cargo. Whether you need to transport gardening equipment, construction materials, or household goods, this trailer offers the capacity and flexibility to handle it all efficiently.

The trailer's frame and body undergo a rigorous hot-dip galvanizing process, which significantly enhances its durability and resistance to corrosion. The Hot-Dip Galvanized surface treatment ensures that the trailer remains rust-free and maintains its structural integrity even after prolonged exposure to harsh weather conditions and rough terrains. This feature guarantees a longer lifespan and reduces maintenance efforts, making it a cost-effective investment over time.

Another critical aspect of this Box Trailer is its sturdy drawbar, constructed from 120\*60\*4mm steel and extending 1500mm in length. The drawbar is engineered to provide exceptional strength and stability during towing, ensuring smooth and safe transportation. Its robust build supports the trailer's overall structure and contributes to balanced weight distribution, which is crucial for maintaining control and preventing accidents on the road.

With an Aggregate Trailer Mass (ATM) of 2000kg, this Box Trailer is capable of carrying substantial loads without compromising safety or performance. The 2000kg ATM rating indicates that the trailer is built to handle heavy-duty tasks, making it suitable for demanding applications such as construction, landscaping, and general hauling. This capacity allows users to transport large quantities of materials in a single trip, improving efficiency and reducing operational costs.

### Our Product Introduction

for

In addition to its practical features, the Box Trailer is designed with user convenience in mind. Its spacious cargo area allows for easy loading and unloading, while the durable materials and construction provide peace of mind when transporting valuable or fragile items. The silver finish not only enhances its aesthetic appeal but also makes it easier to spot on busy roads or work sites. Overall, the Box Trailer combines strength, durability, and functionality in a well-designed package. The Hot-Dip Galvanised surface treatment ensures longevity and resistance to environmental wear, while the 2000kg ATM rating confirms its capability to handle heavy loads safely. Whether you are a business owner needing reliable transportation or an individual looking for a sturdy trailer for personal use, this Box Trailer is an excellent choice that delivers exceptional value and performance.

### Features:

Product Name: 10\*5 Box Trailer  
Type: Box Trailer  
ATM: 2000kg  
Color: Silver  
Surface Treatment: Hot-dip Galvanizing for enhanced durability  
Drawbar Dimensions: 120\*60\*4mm, 1500mm Long  
Internal Dimensions: 3040mm (length) x 1530mm (width) x 300mm + 600mm (height)

### Technical Parameters:

Internal Dimensions	3040mm * 1530mm * 300mm + 600mm
ATM	2000kg
Surface Treatment	Hot-dip Galvanizing
Color	Silver
Trailer Dimensions	4720mm * 2050mm * 1480mm
Drawbar	120mm * 60mm * 4mm, 1500mm Long

### Applications:

The 10\*5 Tandem Axle Hot-Dip Galvanised Box Trailer 2000kg ATM, originating from China, is an exceptionally versatile and durable solution for a wide range of transportation needs. Its robust construction, highlighted by a hot-dip galvanizing surface treatment, ensures superior resistance to rust and corrosion, making it ideal for long-term use in various weather conditions. The silver-colored Box Trailer combines functionality with a sleek appearance, suitable for both professional and personal applications. With an ATM of 2000kg, this Box Trailer is designed to handle heavy loads efficiently. Its tandem axle configuration provides enhanced stability and balance, making it perfect for transporting bulky or heavy items safely. The internal dimensions of 3040mm\*1530mm\*300mm+600mm offer ample space to accommodate a wide variety of cargo, from construction materials to garden equipment and household goods. The overall trailer dimensions of 4720\*2050\*1480mm make it compact enough for easy towing while still providing generous storage capacity. This Box Trailer is particularly suited for a variety of application occasions and scenarios. For tradespeople such as builders, landscapers, and electricians, it serves as an indispensable tool for carrying tools, equipment, and supplies directly to job sites. Its durable tandem axle design ensures smooth transportation over rough terrain and long distances, enhancing productivity and convenience. Additionally, it is perfect for agricultural use, allowing farmers to transport produce, feed, and machinery efficiently. Recreational users will also find the Box Trailer highly beneficial for moving camping gear, motorcycles, bicycles, and other outdoor equipment. The secure box design provides protection against weather and theft, offering peace of mind during travel. Furthermore, it is ideal for moving furniture and household goods during relocation, providing a reliable and spacious option for transporting items safely. In summary, the 10\*5 Tandem Axle Hot-Dip Galvanised Box Trailer 2000kg ATM is a premium product that combines strength, durability, and versatility. Its high-quality materials and thoughtful design make it suitable for a diverse array of applications, from commercial use to personal projects. Whether you need a dependable trailer for work or leisure, this Box Trailer is engineered to meet your needs with efficiency and reliability.

### Customization:

Our 10\*5 Tandem Axle Hot-Dip Galvanised Box Trailer 2000kg ATM offers extensive product customization services to meet your specific needs. Manufactured in China, this box trailer features robust trailer dimensions of 4720\*2050\*1480mm and a durable silver finish achieved through hot-dip galvanizing for superior corrosion resistance. With an ATM of 2000kg, the trailer is designed for heavy-duty use, while the internal dimensions of 3040mm\*1530mm\*300mm+600mm provide ample storage space. We offer customization options including color variations, additional storage compartments, enhanced suspension systems, and tailored surface treatments, all designed to optimize the functionality and durability of your 10\*5 Tandem Axle Hot-Dip Galvanised box trailer.
