

## Dual Axis Hydraulic Lifting Heavy Duty Car Trailer With Lightweight High Strength Alloy And Wireless Remote Control

Our Product Introduction

for more products please visit us on [tippers-trailers.com](http://tippers-trailers.com)

### Basic Information

### Product Specification

- Overall Dimensions: 6200 \* 2500 Mm
- Internal Dimensions: 4800 \* 2000 Mm
- Surface Treatment: Painting
- Color: White
- ATM: 3000kg
- Rated Load Capacity: 2120kg
- Self-weight: 880 Kg
- Guide Wheel: 8 Inches
- Lifting Method: Electric (wireless Remote Control, Manual) (optional)
- Tire: 215 Aluminum Alloy
- Brake: 12-inch Dual-axis Electric Brake
- Certification: 9001/TS 16949、CCC、CE、ADR、DOT
- Highlight: **Dual axis heavy duty car trailer, Hydraulic Lifting heavy duty car trailer, Hydraulic Lifting heavy duty car hauler**

### Product Description

#### Dual-axis Hydraulic Lifting Car Trailer

This high-performance tablet car trailer is specifically engineered for vehicle transportation, ideal for transferring motorcycles, small cars, ATVs, and other vehicles. With its lightweight construction, stable load-bearing design, and user-friendly operation features, it serves as the perfect solution for automotive transport, event logistics, and recreational travel applications.

#### Lightweight High-Strength Construction

- Premium high-strength alloy material provides optimal balance between lightweight design and durability
- Reduces trailer weight to improve towing vehicle fuel economy and minimize transportation energy consumption
- Wide, flat table surface with anti-slip texture securely holds vehicle tires during transport
- Prevents vehicle sliding to protect both the transported vehicle and trailer surface

#### Stable and Reliable Driving Performance

Our Product Introduction

for more products please visit us on [tippers-trailers.com](http://tippers-trailers.com)

- Dual-axle dual-wheel configuration enhances carrying capacity and driving stability
- Maintains stability and reduces shaking risk during high-speed travel and complex road conditions
- Steel spring suspension system effectively absorbs road impact and vibrations
- Protects transported vehicles and trailer structure while extending service life

#### Convenient Connection and Operation Features

- Industry-standard towing hook compatible with most vehicles featuring towing capabilities (SUVs, pickups)
- Quick and simple connection process supporting fast attachment and separation
- Integrated safety chain and multi-pin electrical connector ensure synchronized braking and lighting signals
- Complies with road transportation safety regulations to minimize accident risks
- Adjustable support wheels maintain horizontal stability when disconnected from towing vehicle
- Simplifies vehicle loading and unloading processes with enhanced maneuverability

#### Comprehensive Safety Design

- Low guard rails along both sides prevent accidental vehicle tire displacement
- Orange reflective stickers and reflectors enhance visibility in low-light conditions
- Meets all road driving safety requirements for maximum transportation security
