Product Description

This 14x6 ft dump trailer is a heavy-duty vehicle specifically designed for efficient transportation and convenient unloading, suitable for construction, agriculture, logistics, and various other scenarios.

The trailer features a robust steel frame structure combined with a dual-axle design, ensuring excellent load-bearing capacity and driving stability. With a rated load capacity of up to 5 tons, it can easily handle various heavy-duty transportation needs.

Its core advantage lies in the hydraulic dump system. Driven by a hydraulic cylinder, the cargo box tilts to enable rapid automatic unloading, significantly saving labor costs and operation time. The sides of the cargo box are equipped with high-strength mesh guardrails, effectively preventing cargo from falling during transportation and ensuring driving safety. Additionally, the trailer is fitted with a reliable braking system to further enhance transportation safety.

This dump trailer supports customization services, allowing adjustments to dimensions, load capacity, and other parameters according to specific user requirements. Sold directly from the factory with guaranteed quality, it is your ideal choice for transportation operations.
