Product Description

Double-axle Flatbed Black Paint Car Trailer

This dual-axle flatbed trailer is specifically designed for transporting cars, SUVs, or heavy equipment. Its robust dual-axle structure provides excellent stability and high load capacity, making it ideal for long-distance hauling or carrying heavy vehicles. The full black powder-coated finish not only gives the trailer a sleek, professional appearance but also offers superior rust resistance and corrosion protection, ensuring long-lasting durability in various outdoor conditions.

Key Features

Dual-Axle Design

Equipped with two axles and four tires, this trailer distributes weight more evenly compared to single-axle models. This significantly enhances stability during transit, reduces sway, and allows for heavier loads.

Spacious Flat Deck

The extra-long flat deck offers ample loading space, easily accommodating standard-sized cars or trucks. The deck surface typically features anti-slip textured steel (such as diamond plate), ensuring strong tire grip and enhanced safety during transportation.

Applications

Vehicle Transport

Ideal for hauling race cars, classic vehicles, broken-down cars, or vehicles for sale.

Equipment Hauling

Perfect for moving lawn mowers, mini excavators, or ATVs/UTVs on construction sites or farms.

Emergency Rescue

Can be paired with pickup trucks for vehicle recovery or towing operations.
