Basic Information

Product Specification

- Trailer Dimensions: 4280mm*2050mm*2450mm
- Drawbar: 150mm*50mm 1800 Long
- Internal Dimensions: 2480mm*1830mm
- Surface Treatment: Hot-dip Galvanizing
- Light: LED ADR
- Axis: 50mm Solid Axle, 12-inch Brake
- Rated Load Capacity: 2700kg
- Weight Of The Skin: 800kg
- Jocek Wheel: 8 Inches
- Leaf Spring: 8 Pieces
- Tire: 185R15
- Patterned Panel: 2.5 Emptying, Middle Net

Our Product

Product Description

This is a dual-axle hot-dip galvanized excavator trailer, specifically designed for transporting small excavators, agricultural machinery, and other construction equipment. The entire trailer is treated with hot-dip galvanization, significantly enhancing corrosion resistance and extending service life, making it ideal for use in harsh outdoor environments.

Key Features:

Dual-Axle Design: Equipped with a dual-axle four-wheel configuration, offering high load capacity and stable performance, suitable for transporting heavy-duty equipment.

Hot-Dip Galvanized Frame: The entire frame undergoes hot-dip galvanizing, forming a dense protective layer that resists rust and wear, ensuring durability in damp, muddy, or adverse conditions.

Foldable Rear Fencing: Features foldable metal ladder-style rear barriers, facilitating loading and unloading of small excavators or tracked equipment, while also serving as securing supports.
Towing and Braking System: Front end includes a standard towing hitch, safety chain, and braking connection components, complying with road transportation safety standards to ensure safe operation.

Applications:

Ideal for transporting small excavators, skid steer loaders, mowers, and similar equipment across construction sites, farmlands, mines, and other work areas.
 Suitable for short-distance highway transport or on-site equipment relocation, particularly effective in environments requiring frequent disassembly and repositioning of machinery.
