

Mobile Toilet Trailer – Durable & Portable Sanitation Transport Solution For Outdoor Events, Construction Sites & Emergency Use

Our Product Introduction

for more products please visit us on tippers-trailers.com

Basic Information

Product Specification

- Trailer Dimensions: 3150mm*1740mm*640mm
- Drawbar: 60*40,1150 Long
- Internal Dimensions: 2000*1200*740mm
- Surface Treatment: spray-apply Paint
- Color: Black
- Light: LED ADR Light
- ATM: 750kg
- Guide Wheel: 6 Inches
- Tire: 165/70R13C

Product Description

This mobile toilet trailer is centered on practicality and mobility, specifically designed for temporary sanitation needs in outdoor scenarios. Its robust industrial-grade structure and humanized design details provide stable carrying and convenient transportation for mobile toilet cabins, making it the ideal supporting equipment for sanitation solutions in various temporary venues.

Product Detail Analysis

1. Towing and Safety System

Stable Towing: The front silver towing head, paired with a red safety pin, allows for quick connection to a vehicle's tow hook, ensuring stable power transmission during travel.

Dual Insurance: The anti-detachment chain and red hook form a dual fixation to prevent accidental disengagement. The adjustable support wheel facilitates stable parking and safer loading/unloading.

2. Carrier Platform Design

Anti-slip Load-bearing: The platform uses diamond-pattern steel plates that are slip-resistant and pressure-resistant, stably carrying mobile toilet cabins (suitable for single or combined units). Pre-drilled fixing holes around the platform allow for the addition of straps or buckles for enhanced fixation.

Collision Protection: Black collision guards are installed at the front and rear ends of the platform to prevent the cabin from sliding and colliding during transport, extending equipment lifespan.

3. Humanized Auxiliary Functions

Convenient Boarding: An anti-slip step platform is located at the rear, accompanied by a side metal handrail, facilitating personnel access for cabin loading/unloading or equipment maintenance, enhancing operational safety.

Storage Reservation: The space underneath the platform can store cleaning tools and consumables, making full use of space to meet on-site management needs.

4. Mobility and Adaptability

Flexible Steering: The front universal steering wheel combined with rear dual load-bearing wheels provides a small turning radius, making movement within sites effortless and adapting to narrow working environments.

Heavy-duty Tires: Equipped with 6-ply rating off-road tires featuring a wide tread and strong grip, it adapts to various road conditions such as mud, gravel, and asphalt, ensuring smooth transportation.

Application Scenarios

Outdoor Events: Music festivals, camping festivals, marathons, and other venues with large temporary crowds.

Engineering Sites: Construction sites, road construction, mining operations, and other temporary work areas with dense personnel.

Emergency Support: Rapid sanitation deployment during natural disasters, public health incidents, and other emergency situations.
