

20ft Hydraulic Tipper Trailer with Extendable Outrigger Design and Dual-Axle Tire Configuration for Mobile Homes

Basic Information

Product Specification

- Dimensions Of The Trailer: 7260*2200*800mm
- Tow Bar: 1360mm 150×50mm
- Internal Size: 5900mm×2200mm×800mm
- Surface Treatment: Spray Molding
- Color: Black
- Lights: LED ADR Lights
- Axle: Electric Brake Shaft
- ATM: 4500 Kg
- Tare Weight: 1350 Kg
- Traction Bar Support: Heavy-duty Outriggers
- Fully Welded: Yes
- Leaf Springs: 9-leaf Rocker Roller
- Beam: 80*40*2.5mm
- Steel Pipe: Square Tube
- Wheels And Tires: 225/70R15LT

20ft House Trailers with Extendable Outrigger Design

This 20ft house trailer features an innovative extendable outrigger design, specifically engineered for the safe transport and precise placement of prefabricated houses, mobile homes, and large modular structures. The robust steel frame construction and dual-axle tire configuration provide exceptional stability and load-bearing capacity during transportation operations.

The trailer's advanced adjustable outrigger system enables rapid deployment and provides stable support for entire structures upon reaching their destination. This innovative design allows for efficient unloading and positioning without requiring additional cranes or complex equipment, significantly reducing setup time and operational costs.

Dimensions of the trailer	7260*2200*800mm
Tow bar	1360mm 150x50mm
Internal size	5900mmx2200mmx800mm
Surface treatment	Spray molding
Color	Black
Lights	LED ADR lights
Axle	Electric brake shaft
ATM	4500 kg
Tare weight	1350 kg
Traction bar support	Heavy-duty outriggers
Fully welded	Yes
Leaf springs	9-leaf rocker roller
Beam	80*40*2.5mm
Steel pipe	Square tube
Wheels and tires	225/70R15LT
Brake	12-inch electric drum brake
Adjustable support legs	x4
External support leg	x6

Key Features & Specifications

- Extendable outrigger system for stable support and positioning
- Robust steel frame construction for maximum durability
- Dual-axle tire configuration ensuring transport stability
- Standard tow hitch compatible with pickup and medium-duty trucks
- Integrated safety chains for secure towing operations
- Suitable for long-distance highway and short-distance site transfers

Applications & Use Cases

This versatile trailer is ideal for multiple scenarios including construction sites, camping areas, temporary resettlement points, and housing transport in remote locations. The modular design allows for customization with additional flooring, railings, or integrated electrical and plumbing systems based on specific project requirements.

Perfect for transporting mobile homes, temporary offices, vacation houses, and other modular structures where efficient deployment

and reliable support are essential for operational success.
