Product Description

Product Introduction

The MAGICRAN Two-Horse Trailer is a premium equestrian transport solution crafted for horse lovers and professional riders alike. With overall dimensions of 4380*2500*2600mm and a spacious internal compartment of 3260*1920*2230mm, it comfortably accommodates two horses on every journey. Built to last, the trailer features an all-corrosion-resistant design: both chassis and frame are constructed from double-layer hot-dip galvanized RHS (rectangular hollow section) steel, the body panels are made of galvanized steel sheet, all fasteners are stainless steel, and the roof is molded from special fiberglass reinforced plastic (FRP) — layer upon layer of protection for lasting durability in any weather and road condition.

Safety and performance go hand in hand: the trailer is equipped with a dual-axle electronic braking system and 6-piece double-axle leaf spring suspension, paired with 15-inch aluminum alloy wheels and five sets of 185R14C tires (including one spare), delivering stable towing and reliable braking. Inside, a fully padded equine protection frame keeps horses safe and comfortable, while two large double-opening skylights and side windows ensure continuous airflow throughout the journey. Loading and unloading are effortless thanks to the 1675*670mm side door, 1750*1065mm rear passenger door, and 2030*1210mm staircase door, supported by a high-strength anti-rust back door pillar. Every detail reflects true craftsmanship: a 1.5-meter rotating saddle box, dual-touch switch LED interior lighting, two sets of LED combined tail lights, six width indicator lights, an 8-inch wheel-type jack, a 1.5mm aluminum pattern plate traction bar, and an Australian seven-pin plug — complete professional quality, ready for the road.
